

CAPT. SOUTHGATE HARBOR MASTER

Committee Viewing the Sites
Offered for the Experiment
Station.

A FINAL DETERMINATION

Jamestown Exposition Assigning
Special Days to Different
States.

(Special to The Times-Dispatch.)

NORFOLK, VA., August 7.—Captain Thomas M. Southgate was today elected by the Board of Harbor Commissioners a Norfolk and Portsmouth harbor master, to succeed the late C. Howard Johnson. Captain George A. Sandler, of the New York, Philadelphia and Norfolk Railroad, having declined the position, Captain Southgate will accept the position. It is effective September 1st.

Captain Southgate should prove a valuable man in his position. He is perhaps the best known steamer master in Eastern Virginia, he having served for many years as master of various Old Dominion steamers plying the waters of Eastern Virginia. At almost every steamboat landing in Virginia he is well known, and his familiarity with the laws of navigation well equips him for the duties of the office.

The committee of the Southern Produce Company having in charge the recommendation of a suitable site for the proposed Agricultural Experiment Station, in Tidewater, which is to be under the joint control of the United States Department of Agriculture and the State Board of Agriculture, went to Diamond Springs, in Princess Anne county, today, as a special car over the Norfolk and Southern Railroad, to inspect a site for the station offered there by Prince Anne farmers.

Secretary Coleman, of the Produce Company, piloted the committee, which made up of Messrs. Holland, Portlock, Barlow and Elmerine, Industrial Agent Merritt, of the Norfolk and Southern Railroad; Lyman R. Bibb, of the Princess Anne, and several other men from the latter county, went along.

The committee will inspect the western branch and other sites proposed to-morrow. This inspection will be the final survey of the situation prior to making a recommendation.

The Board of Governors of the Jamestown Exposition has begun the assignment of special days of celebration for the States that will have buildings on the exposition grounds next year. Five of these days have already been set.

Massachusetts will have her celebration on June 5th; Rhode Island will come next, on September 10th; Maryland will follow, on September 17th; New Jersey will be here on October 4th, and Connecticut will hold the boards on October 10th.

The occasions are always attended by brilliant and imposing ceremonies and are looked upon as the extent of the position by the people from the States by which they are held. Addresses are made by the Governors of the States which are celebrating, and other distinguished citizens. Music, too, has its part in the programme, and frequently formal dinners are served to prominent men.

Each State has the arranging of its programme. Some of the dates selected mark some historical event that has been commemorated by the State, while others have no significance.

TO PROTECT THE ROADS.

Dickenson County Will Require Logging Wagons to Pay.

(Special to The Times-Dispatch.)
OSBORNS GAP, VA., August 7.—Under an act of the General Assembly, approved March 14, 1906, empowering the board of supervisors of the various counties of the State to enact such special and local laws as may be found necessary to protect the public roads, the supervisors have enacted a set of laws, to protect the roads from the ravages of lumber and logging wagons. These people have long kept the roads in a condition that rendered them almost impassable for vehicles, and at points, even for horses, and it is the opinion of the board, as well as the people generally, that this condition should not be allowed to longer prevail. Under the enactment of the board, any person or firm who wishes to engage in the business of hauling lumber or logs over the public roads shall be required to execute bond to the road commissioner, sufficient to cover damages that may result to the roads. Notices to this effect are being posted at all yards.

VIRGINIA DENTISTS.

State Association Meets in Annual Session at Old Point.

(Special to The Times-Dispatch.)
NEWPORT NEWS, VA., August 7.—The thirty-seventh annual convention of the Virginia State Dental Association was called to order at noon today in the Chamberlin Hotel, and will remain in session for three days, adjourning Thursday.

About seventy-five dentists from various sections are in attendance.

MARVIN GROVE.

Many People from the Cities Attend Camp Meeting.

(Special to The Times-Dispatch.)
HEATHSVILLE, VA., August 7.—Sunday marked the opening service of the twenty-ninth annual Methodist camp meeting held at Marvin Grove, situated on the border line between Richmond and Northumberland counties. A large crowd was in attendance, though not large as it might have been on account of the smallpox in Lancaster county.

Rev. Dr. H. E. Johnson, of Suffolk, has charge of the meeting, and is being assisted by Rev. J. Wesley Jones, of Norfolk.

folk, and many of the local ministers. The choir is an unusually good one. The choir is an unusually good one. The choir is an unusually good one.

FARMERS HAVE PICNICS.

Tobacco Growers Holding Series of Outings in Pittsylvania.

(Special to The Times-Dispatch.)

CHATHAM, VA., August 7.—The Tobacco Growers' Protective Association will on Saturday next hold their second of a series of picnics to be held in each of the districts of the county. On Saturday the picnic will be in Tunstall District, at Bachelor's Hall, a most ideal place. The forenoon will be given to speech-making by men of prominence, followed by a most bountiful spread, in which the wives and daughters will come in for their part of the pleasure making. The farmers of Tunstall have always taken a very keen interest in the doings of the association, and nothing will go undone that will add to the success of the occasion.

At Chestnut Level on Friday next a basket picnic will be given. A large platform has been erected for dancing, which will be the amusement of the day. Good music will be had, also plenty to refresh the inner cravings, which always adds much to the pleasure of such gayeties.

Washington Affairs.

(Special to The Times-Dispatch.)

WASHINGTON, D. C., August 7.—Patents issued: Charles P. Barry, Winchester, roller window screen; James E. Bowser and J. H. Francis, Newport News, ratchet wrench; William P. Flery, Norfolk, valve; George M. Kilzmillier, Norfolk, typewriting machine; James J. Potter, Suffolk, nut lock.

North Carolina—Peter M. Melton, Whitakers, water meter; John H. Williams, Greensboro, ironing board; John D. Williams, Lewisville, operating table.

Postmasters appointed: Virginia—Johnville Station, Northampton county, John D. Williams, vice T. D. Scott, resigned; Market, Accomac county, Jerome Marshall, vice James A. Pail, dead.

North Carolina—Addie, Jackson county, Lee W. Cogdill, vice W. R. Crawford, resigned.

James R. Caudle has been reinstated rural free delivery carrier route 8 at Handeman, N. C.

EX-GOVERNOR TYLER IN BOWELS OF EARTH

Inspects the Tremendous Work of Tunnel Boring by Compressed Air.

(Special to The Times-Dispatch.)

RADFORD, VA., August 7.—Ex-Governor Tyler and his wife, H. C. and Edward Tyler, were the guests of Dr. C. E. Fisher, chief surgeon for the State, at a visit to the heavy construction work of the company at Alleghany Tunnel, between Christiansburg and Blacksburg, last Tuesday, and report themselves greatly pleased at what they saw. The party went down the shaft in the middle of the work and also entered the tunnel at both portals, viewing with interest the drilling by means of compressed air, forced to both ends of the tunnel and to the work directly beneath them by ponderous compressing engines at ballers, which are being driven night and day.

Already more than twelve hundred feet of tunnel have been bored and timbered, although the actual boring was begun only in May. Mr. Ford, the superintendent, voiced his confidence in being able to finish this mammoth piece of work, the tunnel to be 5,400 feet in length, within a year and a half, and the present rate of progress at the four facings indicates to a layman that the prediction is very likely to be fulfilled.

The party also viewed with intense interest the heavy steam-shovel work in progress at both approaches to the tunnel, and the disposition of the stone taken from the west end by wire cableways, which carry it by means of a hoisting engine off in the gulch to one side of the work. The gigantic Atlantic shovel, one of six purchased this spring for this Tidewater work, at an expense of above \$60,000, in addition to the thirty others along the line, is fairly eating away the hillside and plowing through the dynamited rock in the effort to remove the nearly two hundred thousand cubic yards of solid stone necessary to the approach to grade line for the tunnel.

Within the mile and a half visited by the party, the very best types of the most improved methods of present day railway construction are to be seen in active operation. Three splendidly equipped and thoroughly well-kept camps accommodate the force of several hundred men engaged in the construction, and from every side the party witnessed the most intense and loyal interest in the work in hand. They returned to East Radford via Popper's Ferry, in the late afternoon, greatly delighted at the unusual entertainment which had been afforded them by Mr. Ford, and fully convinced that the construction of the Tidewater in such a systematic and modern way that they will easily be able to complete their heavy contract within the specified time of two years from January last.

A STUPENDOUS CLOCK FOR EYE OF MARINER

The Garrett Winery Erecting One With Mammoth Hands.

(Special to The Times-Dispatch.)

NORFOLK, VA., August 7.—The new illuminated clock for the Garrett Winery, in this city, said to be the largest clock in the world, will have four faces, three of which will be two feet in diameter. The largest, which will overlook the harbor, will be twenty-five feet in diameter, the minute hand being twelve feet six inches long.

The work on the frame for the clock is now in progress, and it will be completed very shortly. Owing to the elevation of the clock, those on vessels in Hampton Roads will be able to tell the hour night or day.

A reception room is to be erected over the clock, which will be elevated about one hundred and fifty feet above the ground. Here will be afforded a splendid view of the harbor and Hampton Roads.

SUNDAY ROBBERS IN PETERSBURG

Money Box Entered and Only Bills of Large Denomination Taken.

NEW POWER PLANT READY

The Machinery Stands Satisfactory Test—Cost a Half-Million.

(Special to The Times-Dispatch.)

PETERSBURG, VA., August 7.—A robbery of rather mysterious character occurred Sunday night at the residence of Mr. J. J. Westmoreland, on Guarantee Street. Mr. and Mrs. Westmoreland went to church, locking up the house. On their return they discovered that they had been robbed of \$100 taken from a box in which it was kept concealed, and the presence of which it was supposed was known only by Mr. and Mrs. Westmoreland. The mystery about the case is that there was no evidence of any one having broken into the house, and that a part of the money contained in the box was left there. Only bills of larger denomination were taken.

Mr. A. T. Chandler, a popular citizen, residing in the western section of the city, last evening celebrated the sixtieth anniversary of his birth, in which his good wife and six children and some of his thirteen grandchildren joined. A large company of friends paid their respects. The occasion was in all respects an enjoyable one, and the company was handsomely entertained.

Miss Eva Frances Schneider and Mr. John Stewart, both of this city, were married at noon today in the parlors of the hotel at Halifax, N. C. The marriage, it is reported, was the consummation of an elopement. Miss Nellie Stewart, sister of the groom, was the only attendant at the wedding. Mr. and Mrs. Stewart will be at home to their friends after the 10th instant.

Everything is about ready for putting the big new power plant of the Virginia Passenger and Power Company in operation. This plant, located in Dinwiddie county, several miles west of the city, at the eastern terminus of the canal, which has been built at a heavy expense. This canal has been widened and deepened, so as to furnish a great power at the plant. A test of the machinery of the plant was made yesterday for some hours, and with entire satisfaction. Electric power sufficient for all lighting, manufacturing, and railway purposes will be furnished, with enough to spare for Richmond, and the running of the cars between the two cities. The cost of the canal and power house was about \$500,000, and this is but a small portion of the amount expended and to be expended by the Goulds in the improvement of their property here.

The horse and buggy stolen in this city several evenings ago from a colored farmer of Dinwiddie county, named Johnson, were recovered yesterday down in Prince George county, where the thief had abandoned them. The horse was found in one field and the buggy in another. A watch and some clothing, which had been left in the buggy, were missing.

William Cates, alias "Red Murray," who was arrested here several days ago, charged with the theft of \$50 in Norfolk, has been indicted in that city. He was fully identified by the man who lost the money, about \$25 of which was recovered here.

Good progress is being made in the work of digging the channel through Chesterfield county for the diversion of the surplus fresh water in the Appomattox. The big steam dredge which is excavating the channel is now working just below Pocahontas.

One Killed; Two Injured.
(Special to The Times-Dispatch.)
ELIZABETH, VA., August 7.—One man lost his life and two others are badly hurt as the result of premature blast explosion at Rock today. The names of the dead: Pietro Barbore, Yordimonde Mirti, hurt badly, all Italians. It seems that some bluffs had been cut off, and one hole failed to fire. Another hole close to it was then sprung, which put off the one that had previously failed to fire. Barbore was literally torn to pieces.

Thoroughbreds Killed.
(Special to The Times-Dispatch.)
HATTON, VA., August 7.—H. D. Pitts, of Scottsville, had five thoroughbred colts killed by lightning last evening. The horses are said to have been valued at \$500 each.

HONOR BESTOWED ON DR. LYMAN B. WHARTON

Has Been Placed on the Retiring List of the Carnegie Foundation.

(Special to The Times-Dispatch.)

WILLIAMSBURG, VA., August 7.—On the application of President Lyon G. Tyler, of William and Mary College, the Board of the Carnegie Foundation for the promotion of teaching, placed on its retiring list Dr. Lyman B. Wharton, professor of Latin in that institution. The appointment was a merited one. Dr. Wharton had served at William and Mary College for thirty years. He was a graduate in several schools of the University, and served as chairman of a Confederate regiment throughout the war. The communication came from Henry S. Prichett, president of the Foundation board. Dr. Prichett is a son of Dr. Carr Waller Prichett, a native-born Virginian, late director of the University of Maryland. As his name suggests, Dr. Carr Waller Prichett is connected with the Carvers, Wallers and other old Virginia families. He son, Dr. Henry S. Prichett, is one of the leading educators of the Union.
